PROFESSIONAL SUMMARY

Full-Stack Web Developer with 5+ years building scalable web applications using React, Next.js, Vue.js, PHP, and Python. Experienced in AWS cloud deployment, Terraform IaC, Docker CI/CD pipelines, REST API design, OWASP-aligned security, and WordPress CMS. Delivered 10+ production websites across fintech, education, e-commerce, and NGO sectors. Certified in Google Cloud DevSecOps (May 2026).

CORE TECHNICAL SKILLS

Languages:	JavaScript (ES6+), PHP, Python, TypeScript, C++
Frontend:	React.js, Next.js, Vue.js, Angular, HTML5, CSS3
Backend:	Flask, REST APIs, Node.js, MVC Architecture
CMS:	WordPress, Strapi
Cloud & DevOps:	AWS, GCP, Docker, Terraform (IaC), CI/CD, Git, Linux, Bash
Security:	OWASP, SaC, PaC, RBAC, Zero Trust, Secure SDLC
Databases:	MySQL, PostgreSQL, SQLite
Testing:	PyTest, Jest
Methodologies:	Agile, Scrum, Version Control, API Integration

PROFESSIONAL EXPERIENCE

Toa Multi Tech — Lead Software Engineer

2025 – Present

- Architected full-stack web apps using React, Next.js, and Flask REST APIs for scalable cloud deployment.
- Designed RESTful API schemas and PostgreSQL databases following OWASP security and scalability best practices.
- Automated CI/CD pipelines using Git and Docker, reducing deployment friction across multiple production environments.
- Administered Linux servers and monitored app performance using cloud-based logging and alerting tools.
- Delivered responsive, SEO-optimized web products using Agile methodology for international clients.

La Colina Five Technologies — Web Developer

July 2018 – September 2025

- Built full-stack web apps using PHP, Python, React, and Vue.js across enterprise and SME projects.
- Deployed WordPress CMS and custom PHP backends for multiple client-facing production websites.
- Implemented Terraform IaC and Docker-based CI/CD pipelines for consistent, repeatable deployments.
- Secured web apps with OWASP-aligned authentication, RBAC, and automated PyTest testing workflows.
- Migrated legacy applications to AWS cloud infrastructure with zero-downtime deployment strategies.

Faith Found Kiddies — IT Support Specialist

December 2023 – August 2024

- Maintained school IT infrastructure including servers, networks, and security systems for 300+ users.
- Trained staff on cybersecurity awareness and OWASP best practices, improving IT compliance across departments.

Tech Worth International — IT Consultant (Seasonal)

2020 – 2024

- Delivered web and cloud consultancy covering AWS architecture, infrastructure analysis, and system optimization.
- Conducted OWASP-aligned security, risk, and compliance assessments for SME and enterprise clients.

T&G Partners Nig. Ltd — Digital Strategy Consultant

2022 – 2024

- Designed and deployed corporate website with React frontend, SEO strategy, and digital branding system.
- Executed data-driven digital advertising campaigns improving client online visibility by 40%.

CYMS — Digital Strategy Consultant (Volunteer)

2020 – Present

- Built SEO-optimized web presence using WordPress, Google Analytics, and Meta Ads for community outreach.
- Delivered digital transformation roadmap improving community online engagement by 40%.

LEADERSHIP & MENTORSHIP

- Led cross-functional teams delivering EduEntryShield — a React and PHP identity verification platform.
- Built Bizapplive customer care platform using Python, Flask, REST APIs, and PyTest-tested backend.
- Mentored junior developers through code reviews focused on OWASP security and clean architecture practices.
- Regularly share thought leadership on software engineering, databases, and DevSecOps via LinkedIn.

SELECTED PROJECTS

Stockara — SAAS

React (TypeScript), Flask REST API, PostgreSQL, AWS | <https://www.getstockara.com.ng>

- Stockara is a modern web-based business management platform designed to help you efficiently manage your inventory, sales, and services from a single powerful system.

My Invoice System — SaaS Billing Platform

PHP, MySQL, Docker, CI/CD, OWASP Authentication | myinvoicesystem.xyz

- Delivered cloud-ready invoicing platform with multi-user RBAC, authentication, and transaction management.

EduEntryShield — Identity Verification Platform

React, PHP, REST API, PyTest, Linux Server | edumentryshield.com.ng

- Reduced school impersonation incidents via biometric-ready access control and identity verification system.

Sempotech Services — Service Booking Platform

React, Flask, PostgreSQL, AWS, Terraform | sempotech.tech

- Connected 50+ vetted technicians to customers nationwide via responsive, cloud-deployed web application.

Realtory ERP - ERP

PHP, MySQL, SEO, Docker, GCP | realtoryerp.com.ng

- Delivered multi-client real estate management solution for modern agency demonstrating full-stack development and GCP cloud deployment skills.

EDUCATION

B.Sc. Computer Science — Esae Benin University, Cotonou, Benin Republic *2021*

SSCE — Ebenezer International Academy, Abuja *2018*
