PROFESSIONAL SUMMARY

Software Engineer with over four years of experience designing, building, deploying, and maintaining production software solutions for SMEs, educational institutions, NGOs, and commercial organizations.

Specialized in developing SaaS platforms, ERP systems, inventory management software, invoicing platforms, business automation systems, and secure attendance solutions using PHP, Python, JavaScript, TypeScript, Flask, React, Next.js, MySQL, Docker, and Google Cloud technologies.

Founder and Lead Software Engineer at Toa Multi Tech, leading a team of three developers while managing software architecture, full-stack development, cloud infrastructure, client engagement, and product delivery. Experienced throughout the complete software development lifecycle, from business analysis and solution design to deployment and ongoing maintenance.

Passionate about building software that solves real operational challenges, improves efficiency, and delivers measurable value to organizations.

CORE TECHNICAL SKILLS

Languages

PHP • Python • JavaScript • TypeScript • SQL

Frontend

React • Next.js • Vue.js • HTML5 • CSS3 • Bootstrap • Tailwind CSS • jQuery

Backend

Flask • PHP • REST APIs • Authentication • Payment Integration

Databases

MySQL • PostgreSQL

Cloud & DevOps

Google Cloud Platform • Docker • Linux • Terraform • Git • CI/CD

Engineering

Software Architecture • SaaS Development • Enterprise Applications • ERP Systems • System Design • DevSecOps • Secure Software Development • API Design

PROFESSIONAL EXPERIENCE

Founder & Lead Software Engineer

Toa Multi Tech

September 2024 – Present

Lead the engineering and technical direction of Toa Multi Tech, delivering software products and enterprise solutions for businesses across multiple sectors.

Responsibilities & Achievements

- Lead and mentor a team of three software developers throughout the software development lifecycle.
- Design software architectures for SaaS platforms, ERP systems, and business automation solutions.
- Build scalable backend systems using PHP, Python, Flask, and MySQL.
- Develop secure RESTful APIs powering both web and mobile applications.

- Deploy and maintain production systems on Linux servers using Docker and Google Cloud technologies.
 - Integrate payment gateways including Paystack and other third-party services.
 - Translate client requirements into scalable software solutions through technical consultation and system analysis.
 - Oversee software quality, deployment, maintenance, and technical documentation.
-

ICT Officer

Committee of Youth on Mobilization and Sensitization (CYMS)

January 2026 – Present

Provide technical leadership for the organization's ICT operations and digital transformation initiatives.

Responsibilities

- Lead ICT strategy and technology planning for organizational operations.
 - Manage and maintain digital platforms and web systems.
 - Advise leadership on technology adoption, cybersecurity, and digital best practices.
 - Coordinate software solutions that improve organizational efficiency.
 - Support cloud services, digital infrastructure, and technical operations.
-

Software Engineer (Freelance & Client Projects)

2021 – Present

Designed and delivered custom software solutions for businesses, NGOs, educational institutions, and entrepreneurs.

Delivered projects including:

- SaaS platforms

- Enterprise Resource Planning (ERP) systems
- School security systems
- Inventory & POS software
- Invoice management platforms
- Business websites
- Custom automation systems

Responsible for solution architecture, backend development, frontend development, deployment, database design, API integrations, and ongoing maintenance.

SELECTED PROJECTS

My Invoice System

Cloud-based invoicing platform that enables freelancers and SMEs to generate professional invoices and receipts through an innovative pay-as-you-use pricing model.

Highlights

- Multi-business support
- PDF generation
- Wallet-based billing
- Responsive dashboard
- Client reminder system

Technologies: PHP, MySQL, Bootstrap, JavaScript

Stockara

Business management SaaS platform combining inventory management, Point of Sale (POS), customer management, service tracking, and business reporting into one solution.

Highlights

- Barcode POS
- Inventory tracking
- Service management
- Android application
- Subscription-ready SaaS architecture

Technologies: PHP, MySQL, Bootstrap, JavaScript

EduEntryShield

Secure QR-based attendance and school access management platform designed for educational institutions.

Highlights

- QR authentication
- Live camera scanning
- Parent notifications
- Multi-gate management
- Attendance analytics

Technologies: PHP, Vue.js, React Native, MySQL

Realtory ERP

Cloud ERP platform for real estate agencies supporting property management, organization management, subscription billing, reporting, and operational workflows.

Technologies: PHP, MySQL, Paystack API

EDUCATION

Bachelor of Science (B.Sc.) Computer Science

ESAE University, Benin Republic

2021

- GPA: 2.50 / 4.00
 - Second Class Lower
-

CERTIFICATIONS

- Google Cloud DevSecOps Professional
 - Diploma in Network & Information Technology (DNIIT)
 - CompTIA Server+
 - CompTIA Network+
 - CompTIA A+
 - Full-Stack Web Development
 - Git Fundamentals
 - Scrum Basics
 - Windows Server Configuration & Administration
 - Advanced PHP Programming
 - Object-Oriented Programming
 - Cybersecurity Fundamentals
 - Web Analytics
-

LEADERSHIP

- Founder, Toa Multi Tech
- Lead Software Engineering Team
- ICT Officer, Committee of Youth on Mobilization and Sensitization (CYMS)

LANGUAGES

- English (Professional Working Proficiency)
